

White Paper DollarCat

DollarCat is meme coin and a USDC rewards token launched on Binance Network. Simply hold \$DCCAT token and start earning USDC rewards. Rewards are deposited into \$DCCAT holder's wallet whenever a sell of \$DCCAT is made.

How DollarCat works

\$DCCAT token has a tax where 8% of every sell goes back to the holders in the form of USDC. Another 2% goes to the auto liquidity, which will help us build a strong project. USDC rewards goes from the contract to the \$DCCAT holder's wallet when sells happen. With higher volume, rewards get paid out faster. But ultimately, rewards will still be accumulating in the contract until the claim is done.

Tokenomics

Buy Tax 0 %

Sell Tax 10 % (2 % auto liquidity, 8 % USDC rewards to holders)

\$DCCAT Supply

Max Supply: 1,000,000,000 \$DCCAT Cirkulating Supply: 1,000,000,000 \$DCCAT
